Nikola Antic

GRAPHIC DESIGNER

🎓 EDUCATION

High Medical School in Cuprija »
2012 - 2016

Medical Technology/Technologist

Medical technicians are required to obtain some undergraduate education in addition to certification from the state. Employees in this field typically work in laboratories but may also work directly with patients.

College of Applied Health Sciences »
Professional Studies in Cuprija »
2016 - 2019 (expected)

Professional Medical Technology/Technologist

VMS Cuprija is a college specialized in health care. Students are already fully involved in the management of the college. College is convinced that the development of a strong centralized student service for the whole ACAS in Southern Serbia will offer new development chances for all partners.

👜 EXPERIENCE

I have experience in all fields of graphic design as a freelancer and I mostly worked on logo and branding. You can view some of my work that I published on some platforms. As opposed to how many years I have, I think I have many projects done. Only those who are my favorite are posted. Works are mostly related to the logo, branding, websites, social media, t-shirts, business cards, letterheads, menus for restaurants, etc.

My offer include:

1. professional, unique work
2. very fast response
3. perfect communication
4. unlimited revisions until you are satisfied

Money is important, of course, to everyone, also to me. I have an idea - the goal I would like to achieve in financial terms, but money is on the last place. I don't want to work for money only. My goal is partnership with you, collaboration, trust, respect, specialization, satisfaction and career. I would love to work from home for you, and to give you best results.
